

School of Pharmacy and Pharmaceutical Sciences Strategic Plan 2019-2024

STRATEGIC PRIORITY #1: PURSUE GROUNDBREAKING, INNOVATIVE RESEARCH		
Initiative	Key Metrics to Monitor Progress	Targets for Each Initiative
1.1) Focus research on: (1) niche areas that have growing presence and impact locally, nationally and globally and/or (2) special populations relevant to our local region	• Number of successful grants (Federal and non-Federal) and their dollar amounts that support research in special populations	• 25% increase in innovative research grants over 5 years • >\$5 million of extramural grants (NIH, NSF, DOD, FDA, CDC) for all faculty
	• Measure other financial support	• Steady growth per year in amount of funding (increase by 5% per year for small grants, SUNY grants, etc.)
1.2) Form and sustain transdisciplinary, interprofessional and network-based research groups	• Number of transdisciplinary, interprofessional and network-based research groups	• Establish at least 3 new transdisciplinary, interprofessional, and network-based research groups and measure their longevity
1.3) Ensure faculty support to allow time for research, publishing and grant writing	• Measure the number of peer-reviewed publications, presentations and invited presentations and grant success	• Steady growth in the number of presentations and peer-reviewed publications • At least 1 peer-reviewed publication per faculty member per year
	• Measure the degree to which the school supports faculty through balancing teaching and research	• 10% increase in support from TAs and other support personnel over 5 years
1.4) Retain and develop high quality faculty	• Rate of advancement on career ladder for faculty	• 100% clinical faculty promoted within 6 years; tenure-track faculty on time or early to achieve tenure • 90% year-to-year retention of faculty that successfully meet the tripartite mission of teaching, research and service are retained at the school
	• Measure the financial and mentoring support within the school (e.g., pilot grants, travel support, support for student participation)	• Percentage of faculty who have at least 1 grant source of revenue within each 2-year period. Steady increase in percentage over 5 years • 100% faculty participation in mentoring program either as mentor or mentee
	• Measure success of newly recruited faculty by measuring grants obtained before and after employment at school	• 30% of newly recruited faculty will have at least \$10k of grant funding one academic year after joining school

STRATEGIC PRIORITY #2: PRODUCE STUDENTS WHO WILL HAVE A COMPETITIVE ADVANTAGE IN THE CHANGING HIRING ENVIRONMENT			
Initiative	Key Metrics to Monitor Progress	Targets for Each Initiative	
2.1) Provide unique educational experiences through curricular, extracurricular and co-curricular activities (e.g., home care rotations, telehealth, The Rural and Underserved Service Track [TRUST], research track)	• Extent of exposure to fellowship/internships/residency programs, panels and workshops (student survey: rate the extent that you were exposed to residency programs, panels and workshops and check from which source)	<ul style="list-style-type: none"> • >35% of students who apply to a residency, fellowship or industrial internship are successful (follow applicants through Phorcas in order to measure how many students apply to residencies and are matched) • 100% of students are exposed to internships/residency/fellowship panels, workshops, or showcases, etc. 	
	• Number of students who complete an APPE rotation with under-served populations and number of post-graduate placements with under-served populations (e.g., rural settings, geriatric placements, etc.)	<ul style="list-style-type: none"> • >10% of graduates practice with underserved populations • >20% of graduates practice in a rural setting • >20% of graduates practice in upstate NYS • >20% of students complete an APPE rotation with under-served populations 	
	• Number of IPE experiences (especially with medical students or physicians)	• >75% of students have IPE experiences with medical students or physicians	
	• Number of students presenting at local, regional, state and national meetings	• By the end of P4 year, >75% of students will have presented at a professional meeting (local, regional, state, national)	
	• Develop 5 unique co-curricular experiences related to pharmacy (e.g. nuclear pharmacy, oncology, patient care in community setting, geriatrics, etc.) over the next 5 years	• >50% of students attended a unique co-curricular experience and 100% express satisfaction with their unique co-curricular experiences	
2.2) Provide all PharmD students with multiple research/scholarship opportunities (e.g., summer research fellowships, Capstone projects, grant funded projects, etc.)	• Number of students awarded a summer research fellowship; number of students on grant-funded research projects; number of students who take the initiative to do research with faculty	<ul style="list-style-type: none"> • >25% of all students carry out research (outside of Capstone) by their graduation • >50% of faculty actively offer research opportunities to students, outside of Capstone 	
	• Percentage of graduates that go on to a residency/fellowship	• >33% of graduates go on to a residency/fellowship	
	• Number of students whose name appears on a research/scholarship abstract or publication	• >40% of PharmD graduates have an abstract or publication within three years of graduation	
2.3) Establish a clinical campus (clinical education center) in NYC (e.g., level 1 trauma experience, expanded scope of practice, etc.)	• Number of graduating students who finished their third and fourth year at the clinical educational center in NYC ([a] number of students completing Level 1 trauma rotation per year and [b] student satisfaction survey)	<ul style="list-style-type: none"> • >33% of students who attend the clinical campus successfully apply to a residency, fellowship or industrial internship • >90% of students at the NYC clinical campus express satisfaction with the experience and with their contacts for potential residencies/fellowships and internships 	
2.4) Establish a cutting-edge PhD program starting in 2021	• Measure research recognition (e.g. publications per PhD student, number of invitations and presentations, number of awards)	• >20% increase in PhD student research recognition (awards, invitations, publications) from 2022-2024	
	• Measure enrollment rates in PhD program	• At least 15 students enrolled by year 2 of program	
2.5) Provide leadership opportunities for students (via clubs, leadership workshops, student government, committees, etc.)	• Measure number of leadership workshops and training available to students. Measure student participation in workshops and training	• >10% increase in the offering of leadership workshops and training. >10% increase in student participation	
	• Number of students in leadership positions in the school, NYS, national organizations, etc.	• >25% of all students involved in leadership positions	
2.6) Develop graduate level dual degrees with PharmD (e.g., MBA/MPH/PhD)	• Number of dual degree programs that are developed	• At least 2 dual degree programs are in progress by 2024	

STRATEGIC PRIORITY #3: DIVERSIFY OUR FUNDING STREAMS		
Initiative	Key Metrics to Monitor Progress	Targets for Each Initiative
3.1) Commercial funding	<ul style="list-style-type: none"> Number of companies (diversity of companies, number of different industries represented, including non-profits, number of different size partners represented, dollar amount of industry funding and sustained donations over time) 	<ul style="list-style-type: none"> Steady growth in commercial funding and steady increase in dollar amount: >\$100k over 5 years
		<ul style="list-style-type: none"> Increase of 2 companies and 1 new industry that support school
	<ul style="list-style-type: none"> Number of spin-off companies and NIH Small Business (SBIR) grants (diversity of companies, number of different industries represented, including non-profits, number of different size partners represented, dollar amount of industry funding and sustained donations over time) 	<ul style="list-style-type: none"> Steady growth in number of patents/companies (>5% growth each year)
3.2) Foster relationships with donors	<ul style="list-style-type: none"> Total donations to SOPPS 	<ul style="list-style-type: none"> 10% increase in monetary donations per year
	<ul style="list-style-type: none"> Number of SOPPS faculty and students that interact with potential donors (community, alumni, industry and political) 	<ul style="list-style-type: none"> 10% of receptions for donors involve student participation 25% of SOPPS faculty meet with potential donors
3.3) Create endowed faculty positions/chairs in groundbreaking research areas (e.g., precision medicine/genomics/diagnostics/health vulnerable populations)	<ul style="list-style-type: none"> Funding levels for endowed faculty positions/chairs 	<ul style="list-style-type: none"> \$2,000,000 raised for the establishment of an endowed faculty chair

STRATEGIC PRIORITY #4: CREATE AND EXPAND NETWORK AND ECOSYSTEM AT THE COMMUNITY, STATE AND NATIONAL LEVELS		
Initiative	Key Metrics to Monitor Progress	Targets for Each Initiative
4.1) Generate new networks for recruiting top quality students	• Number of new student recruiting locations / relationships	• At least 10 new academic locations/relationships to recruit top quality students by 2024
	• Number of articulation agreements with educational institutions	• At least 2 new articulation agreements with outside universities and colleges per year and at least 1 Historically Black Colleges and Universities (HBCU) or Hispanic-serving Institution (HSI) agreement over 5 years
	• Maintain or increase diversity in student recruitment and enrollment (economically disadvantaged, non-traditional, rural, etc.)	• 20% of each class will be underrepresented minorities (URM), 15% of each class will be first-generation college students, and 15% of each class will be from an area with a shortage of health professionals (rural)
	• Maintain or increase number of students enrolling via early decision	• 35% increase in students enrolled via early decision by 2024
	• Increase number of international and out-of-state students	• 20% of each class will be international/out-of-state students
	• Increase number of Binghamton University undergrads attending SOPPS	• 50% of entering class will be comprised of Binghamton University undergraduate students over 5 years
	4.2) Generate new networks for recruiting faculty	• Number of new connections for recruiting new and diverse faculty
4.3) Generate new networks to recruit preceptors and create fellowships or PGY-2 residencies, to meet the needs of community and school	• Number of new and different settings/institutions for preceptors and track by specialty (e.g. health systems, community pharmacies, independent/specialty pharmacy, etc.)	• Recruit at least 10 new preceptors per year
	• Increase geographic reach and quality of health system and industry partnerships	• Enlist at least 2 new settings/institutions per year with affiliation agreements/MOUS where we can hire qualified preceptors
	• Success of SOPPS fellowships/PGY-2 residencies (number of student applicants; frequency of matching [100%]; measure research projects, teaching opportunities and interactions of the resident with the community)	• 3 successfully established fellowships/PGY-2 residencies by 2024 • At least 3 health system and/or industry partnerships • At least 2 health system partners in the top 25% of hospitals • At least 2 partnerships with a global reach by 2024 (e.g., health systems, national foundations, schools in India and China, etc.)
	• Measure preceptor retention	• Retain 85% of preceptors over 5 years
4.4) Generate new networks for advocacy (e.g., patients, legislature, etc.)	• Number of faculty advocating for patients and/or with legislators	• 5% increase per year in number of contacts made by faculty advocating for patients and/or with legislators • 20% increase in the number of presentations done for regulatory/governmental/NYS/community agencies
4.5) Generate new networks for IPE	• Number of new networks that lead to new IPE experiences	• Steady increase in new networks for IPE over 5 years • 10% increase in number of IPE experiences generated from existing IPE network over 5 years
